SOLAR & SECURITY INFORMATION

Solar and Security Window Film by Llumar provide a strong, protective barrier between you and the glass in the event of accident. Even with any window film, with strong enough forces the window may still break, however with Solar and Security Window Film the glass fragments adhere to the film such as;

- Car occupants are shielded from dangerous flying glass shards
- Passengers are protected from intruding accident debris
- Flying glass is contained and does not interfere with side airbag performance

In less than five seconds, a thief can shatter your car window and rob you of your valuables. This can be particularly dangerous if you are in the vehicle during the attack.

LLumar Solar and Security Window Film is the best defense against a "smash and grab" attack.

- By holding broken glass in place, slows access to the vehicle interior
- The increase time to break-in and additional noise call attention to the thief
- If you are in the vehicle during an attack, you'll have more time to escape
